PROFILE

Computer Science and Engineering graduate specializing in full-stack web development and backend systems. Experienced in building scalable applications using Node.js, Laravel and Django with strong knowledge of RDBMS and API development. Over the past 11 years, I have developed expertise in managing game server infrastructure, including backend systems, performance optimization, and monetization strategies serving concurrent users. Seeking software development opportunities to apply technical expertise and problem-solving abilities.

EDUCATION

BSc (Hons) in Computer Science And Engineering

School of Data and Sciences | BRAC University

Result: CGPA 3.30 / 4.00

Best Thesis Award (Cybersecurity) | Dean's List (3rd Semester)

Dhaka, Bangladesh

2021 - 2025

Higher Secondary Certificate

Adamjee Cantonment College

Result: GPA 5 / 5

Dhaka, Bangladesh

2018 - 2020

Secondary School Certificate

BAF Shaheen College Dhaka

Result: GPA 5 / 5

Dhaka, Bangladesh

2016 - 2018

EXPERIENCE

Independent Software Developer & Administrator

2014 - Present

- Architected and deployed scalable multiplayer server infrastructure supporting 100+ concurrent users with 99.9% uptime, utilizing Java and MySQL for real-time data processing
- Developed custom backend systems and administrative dashboards for server management, player analytics, and automated subscription-based monetization
- Managed end-to-end operations including payment gateway integration, community management, customer support, and infrastructure optimization

PROJECTS

- **MedNet** *CSS, HTML, PHP, Blade, SCSS, JavaScript, Laravel* github.com/samixshady/MedNet

A web platform enabling customers to buy medicines, leave reviews, and sellers to manage inventory with admin controls for account management.

- **Points Game** *Python, OpenGL* github.com/samixshady/Points-Game

Developed a Pac-Man-inspired OpenGL game with functionalities like play, pause, level progression, scoring, and a challenging hard mode, delivering interactive gameplay and visual appeal.

- **Housing Price Prediction** *Python* github.com/samixshady/Price-Prediction

Predicting Housing Price of California using machine learning techniques and data visualization.

- **OS Shell** *C programming language* github.com/samixshady/OS_Shell

Developed a custom UNIX shell in C capable of executing Linux commands, handling I/O redirection, piping, command sequencing, history tracking, and signal management.

TECHNICAL SKILLS

- Languages: Python, Java, C, C++, PHP, JavaScript, Kotlin, ARM Assembly
- Frameworks & Tools: Laravel, Django, Node.js, Flask | Frontend: HTML, CSS, SCSS, Blade
- Databases: MySQL, MongoDB | Tools: Git, OpenGL, Flutter, LaTeX, STM32
- Soft Skills: Teamwork, Time Management, Leadership, Effective Communication, Critical Thinking
- Natural Languages: Fluent in English and Bengali
